This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) for Viraxy Group B.V. and found that the RNG complies with the relevant standards.*

The RNG uses a hardware generator. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated shuffling for card games. The shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.
